(54) **WIRE FOR CLOTHING**

(57) Abstract:

PROBLEM TO BE SOLVED: To provide resin wire for clothing excellent in rigidity and creep resistance.

SOLUTION: The wire for clothing comprises a polyamide (I) composed of (a) dicarboxylic acid units comprising 50-100 mol% of terephthalic acid units and (b) diamine units comprising 50-100 mol% of 6-8C aliphatic alkylene diamine units. Alternatively, the wire comprises a polyamide composition formulated with 5-100 pts. wt. of inorganic filler (II) and/or organic filler (III) based on 100 pts. wt. of the polyamide (I).
